

Compilation techniques Final Project

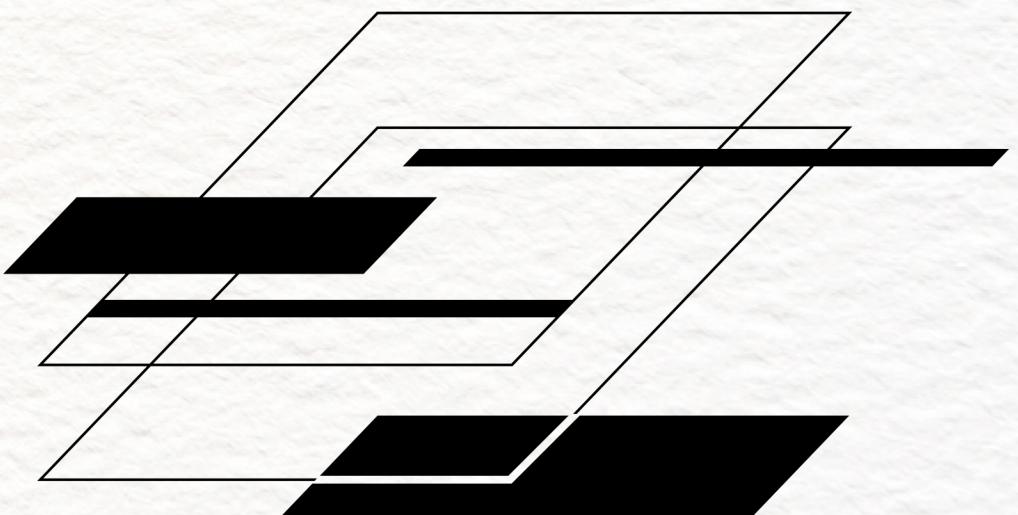

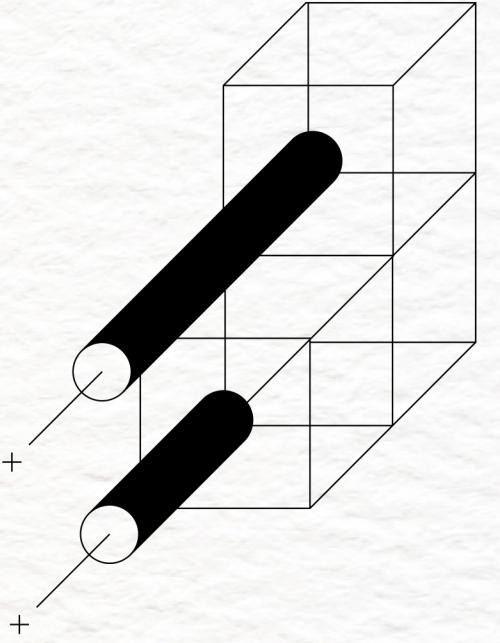

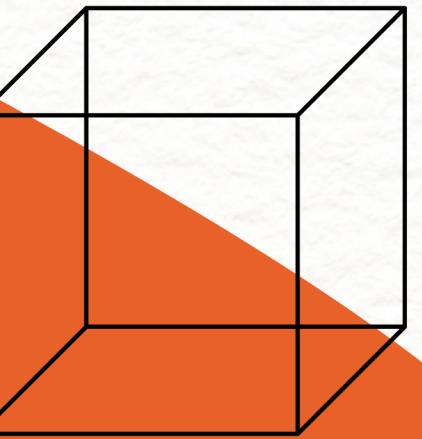

Indo - English Translator

Edsel, N Jason, Weihan

Background

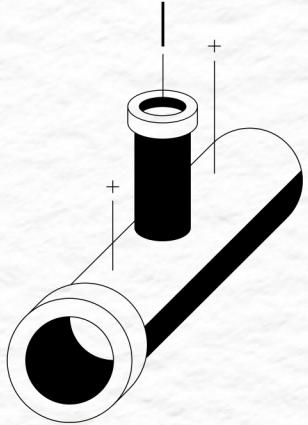

Many language translators are available on the internet, however most of them are unable to translate slangs. Slangs are supposed to be translated because more people are using them in everyday conversations these days.

Problem Description

Based on the result of English First (EF) Proficiency test, Indonesia ranks 32nd - from a total of 72 countries surveyed with a score of 52.91 points.

Most translators out there do not include slangs, which causes errors during translations.

Problem solution

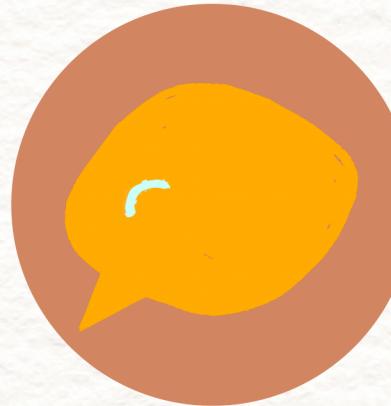

With our Indo To English translator, people are now able to communicate with others using English language.

People are also able to learn English by translating words little by little.

People do not longer need to be afraid of translations error caused by including slangs.

Features of our solution

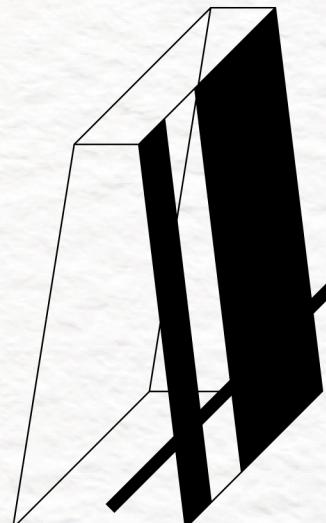

Includes Slangs!

Say bye-bye to
translation errors caused
by translating slangs

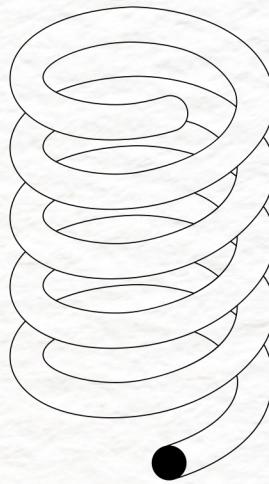

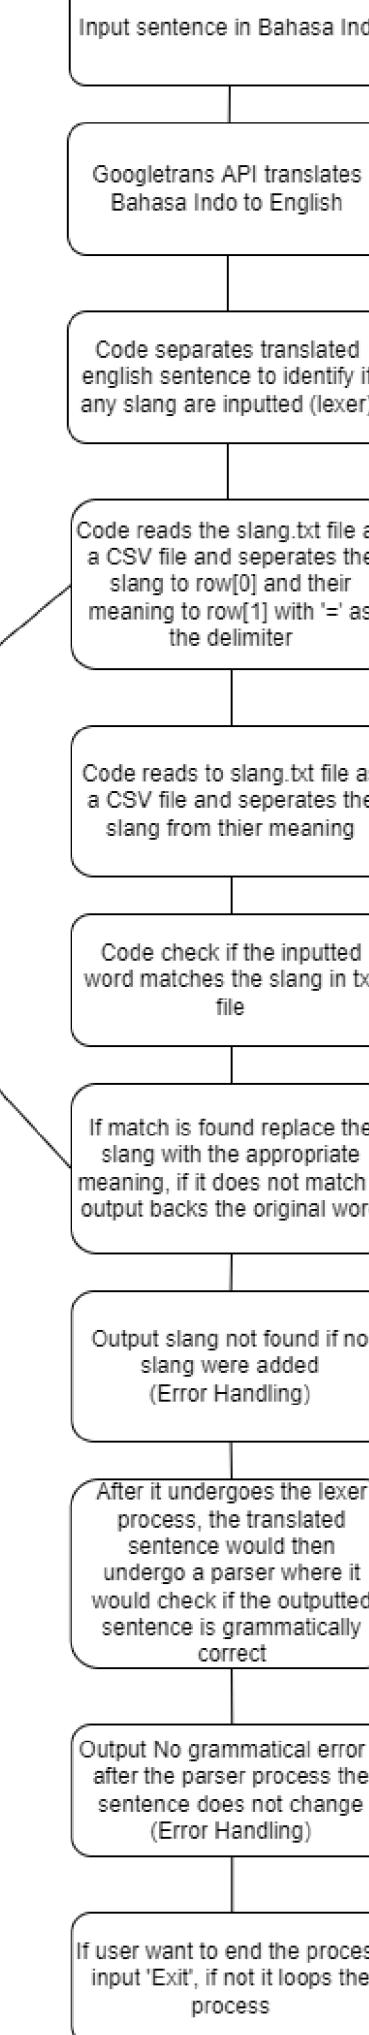

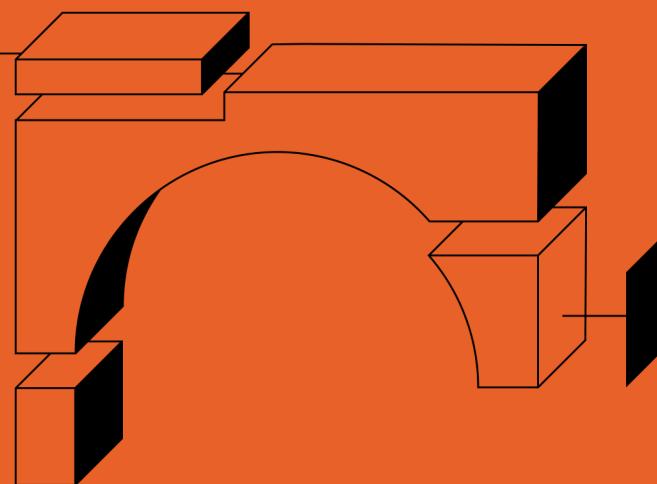

Error handling

The translator would
also output a
grammatical correct
version of the translation

Flowchart

Thank
you

See you next time!
